

WANT TO BECOME A MENTOR TO FRESNO STATE AGRICULTURE STUDENTS?

What does it mean to be a Mentor?

Mentors are dedicated to providing support, advice, and encouragement to their mentees. We encourage mentors to build rapport and a professional relationship with the mentee for one semester.

Why should you become a Mentor?

Becoming a Mentor is about giving back to the students and helping them gain agricultural knowledge and professional experiences. Mentors will have the opportunity to help students grow.

What is expected of Mentors?

- Meet with your mentee at least once a month.
- Answer questions to the best of your knowledge.
- Arrange activities that encourage professional development, such as mock interviews, a resume review, or job shadow day.

How do you become a Mentor?
